

Replacement Bottles for First-Aid Emergency Eyewashes

EYESPRAY®

Article Nr: 850 1004

EyeSpray is a first aid eyewash with two bottles containing sterile water buffer solution projected in the form of a spray.

The bottles used with EyeSpray eyewashes contain a solution specially developed for rinsing the eyes. The rinsing water is chlorine-free and perfectly sterile.

It is recommended that the bottles be replaced 3 years after installation, and imperatively after having used the eyewash, even after having simply opened it.

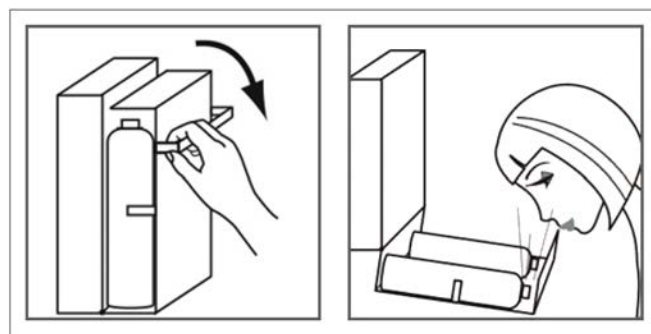

A torn red sealing label and/or a red flag sticking out from the box indicate that it has been opened.

Like all GIA-Premix emergency showers, EyeSpray eyewashes, as well as the bottles, have been designed and are manufactured in Sweden.

:

- Spray bottles produced by Aurena lab.
- Produces in cleanrooms
- Quality certified process
- Rinsing time 15 minutes
- Replacement of bottles after 3 ans
- Buffered saline sterile solution
 - NaCl: 0.9%
 - NAH_2PO_4 : < 1%
 - H_2O
 - pH: 7,4
 - MSD available
